

COMPANY OVERVIEW

Abacus Quality System Services, Inc. (AQSS) is a Multidiscipline Third-Party Inspection (TPI), supplier assessment, technical and professional services company based in Houston, TX USA.

We aim to establish a co-operation with our customers in order to provide them with the services that fit their needs at the lowest possible cost, in compliance with the applicable regulations and by all means the most appropriate solution. To that end, we offer standard solutions where possible, and custom-made solutions where needed. Our services are aimed at improving safety, quality and the environment. Our efficient staff and qualified inspectors/auditors are dedicated to meeting customer requirements. AQSS has expanded its services to customers in US, Europe, Middle East, China, South East Asia and Far East Asia.

Our forte is reliability, cost competitiveness, responsiveness and professionalism.

CORE COMPETENCIES

Inspection Services

Inspection Services are provided in wide range of industries including Oil & Gas, EPC and Aerospace industries. Our highly experienced team of engineers and inspectors conduct third party witness inspection, technical review and verification for the following:

- Electrical & Electronic systems, control panels & assemblies
- Material Inspection & Test Reports
- Mechanical Tests, Factory Acceptance Tests
- Hydrostatic and Performance Tests
- Welding Operations
- NDE and Visual Examinations
- Plating, Painting and other Coatings
- Rotating/Reciprocating Equipment
- Final inspection/acceptance including Oil/Gas and Aerospace parts/assemblies
- Pressure Vessels / Package Boiler
- Piping, Pipe Fabrications, and Testing
- Heat Treatment
- Electrical controllers & Instrumentation

Supplier/Internal Auditing & Assessments

AQSS auditing services provide independent assessment of suppliers' capabilities as per needs and scope provided by the customers. The scope of the audits is tailored to the clients' needs, focusing on processes, system, products, and capacities of the supplier. System audits can be based on customer requirements and/or an international standard (like ISO 9001, ISO 14001). The audits may include, but not limited to, areas such as quality; environmental; health and safety management; and compliance to certain codes of manufacturing.

Similar auditing/assessments can also be done internally for the organizations and the its sites (for a multiple site organization).
